SUPPLEMENTARY INFORMATION

I. Abstract

The Census Bureau conducts the Business and Professional Classification Report survey to collect information from new businesses to obtain proper industry classification for use in economic surveys and the Economic Census. The survey, conducted quarterly, samples businesses with newly assigned Employer Identification Numbers (EINs) from the Internal Revenue Service (IRS). Businesses can only be selected once for the survey. The survey collects data about a business in such areas as: primary business activity, company structure, size, and business operations. This information is used to update the sampling frame for current business surveys, which ensures high quality economic estimates. Additionally, by ensuring proper industry classification, this survey reduces burden for the businesses in the five-year Economic Census, as the questions in the census are tailored to the industry in which the business operates. There are no major changes to this collection. Minimal changes will be made to the wording and organization of existing questions and instructions.

II. Method of Collection

We will collect this information over the Internet and by telephone follow-up.

Respondents will receive a letter directing them to the Internet to report their information. After three weeks, respondents will receive a reminder letter about the survey. After the due date, the Census Bureau will conduct a telephone follow-up operation for nonresponse. Throughout the survey, telephone assistance is available for respondents with questions and for those that cannot report over the Internet.
